<p><i>Surgical procedure</i></p>	
DESCRIPTION OF GIFT	VALUE
VCA doctors & staff donated their time and expertise to conduct a needed second surgery on the Honolulu Police Department's cadaver canine Cache. Cache suffered from "vaginal hyperplasia." this condition is where a female canine's vagina protrudes out of her anus which can cause infection and death. This is prone to female canines that are not spayed and certain breeds. The second surgery was needed because swelling was still present and tissue was still protruding from Cache's anus. It was the surgical veterinarian's opinion that the tissue needed to be removed or infection would set in and she could have died.	\$2,589.13
